

8th MEET THE PROFESSOR

Advanced International Breast Cancer Course

PADUA, NOVEMBER 15-17 2012

Directors

Pier Franco Conte, Gabriel N. Hortobagyi

Presentation

Mortality from breast cancer is rapidly declining in most countries worldwide and nowadays breast cancer patients have a great chance for cure. These results are extraordinary if we remember that breast cancer is by and large the most frequent tumor among females and it is still considered one of the “big killers”. Now that we are so close to our objectives, we must maximize our efforts to provide a more personalized approach to the individual patient, to optimize the appropriate use of resources and to develop innovative therapies for the patients not yet cured.

With these goals in mind, the Programme of this International Conference includes lectures on the molecular characterization of primary and metastatic tumors, update management of early and advanced disease, strategies to overcome resistance to available therapies, innovative therapies, preservation of fertility and treatment of male breast cancer. Clinical case discussions and debates are also planned to discuss topics which require a multifaceted approach or are matter of controversy.

This 8th Breast Cancer Conference includes a highly qualified international faculty, but will maintain its characteristics of a friendly forum where international opinion leaders and attendees will exchange experiences and share the most exiting advances. In order to reward scientific excellence and to foster international cooperation, the International Scientific Committee of the 8th AIBCC will award the third International Prize for Breast Cancer Research to a scientist who has published a breakthrough paper in the previous year and the Monica Boscolo Research Grant to an Italian scientist for a research project to be conducted in cooperation with a foreign institution.

We welcome medical oncologists, pathologists, breast surgeons, radiation oncologists and basic scientists to listen to breast cancer leaders and to exchange experiences in a friendly atmosphere.

Addressed to

Oncologists, radiologists, radiation oncologists, pathologists, surgeons
